WIRELIT

The city's power is out. You are the night watchman.

A calm circuit puzzle set in a city at night. Every fuse box you open is a small square board of wires. Tap any piece and its whole ring turns a quarter turn. When current reaches every window lamp, the box reads **"All the lamps are lit"**, the phone gives one long, warm pulse, and a window in the skyline stays lit.

No score, no timer, no move counter. Every box has **exactly one solution**, verified by a solver, and never opens one turn from solved.

CONTENT

288 hand-picked boxes, easy to hard	**12** neighborhoods, one new idea each
1 / day Tonight's Box, same for everyone	**0** ads, purchases, accounts, network

- Sleeping windows (lamps that must stay dark), chain rings, gear rings, 9×9 squares, bolted pieces, half-turn and reverse rings.
- Every neighborhood has its own light, lamp shape, silhouette and musical key.

BUILT FOR APPLE PLATFORMS

- **Interactive widget** and **Siri**: play Tonight's Box on the Home Screen or turn its rings inside Siri.
- **Core Haptics** relay clicks; **sound synthesized at runtime**, no audio files.
- **On-device Apple Intelligence** writes the watchman's logbook with guided generation and a tool call, validated line by line. Hints come from the solver.
- **Game Center** achievements and Games app activities; no leaderboards. **Apple Watch** app and complication, **Mac** and **Apple TV**.
- **iPhone Duo**: unfold for two pages, the box on the left and the city on the right. **iCloud** keeps every lit window.
- VoiceOver ring actions, Dynamic Type, Reduce Motion; Apple's accessibility audit passes. Native Swift and SwiftUI, no engine.

Unreleased · TestFlight build (iPhone + Apple Watch, Mac) · Hawk & Mason Studios — Hakan Aydın, independent developer

The city: one window per box

Harbor: chain rings

Midnight: every neighborhood's light

The watchman's logbook, written on-device

Mac and unfolded iPhone Duo: two pages, the box on the left and the city on the right.
